Forecast for Tuesday 15 Dec 2020

Weather: Mainly dry for daylight hours with some sunshine, some patchy low cloud across the Trossachs and Argyll ranges. Chance of a brief shower along coastal ranges across Argyll and Lochaber. Showers will extend more widely north from late afternoon, wintry above 800 metres or so.

Chance of cloud free mountain/hill tops above 800m: 70%, some cloud down to 700 metres across the Trossachs and Argyll ranges, best of the cloud breaks across Arran and Kintyre until early afternoon. Low cloud becoming extensive after dark down to 500 metres.

Visibility: Mostly very good during daylight hours. Poor in cloud and snow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Notable wind chill at height. Icy surfaces at higher elevations.

Forecast for Wednesday 16 Dec 2020
Weather: Widespread rain, with snow on higher summits, spreading north in the morning. Turning dry in the afternoon but further widespread rain and higher summit snow spreading east after dark. Very windy.

Maximum wind: Southerly gusts 50 to 60 mph for most of the day on the tops.

Chance of cloud free mountain/hill tops above 800m: Widespread low cloud between 450 and 700 metres in morning rain and snow, this breaking up from the west for a short while in the afternoon before returning from id-afternoon. Low confidence for detail at this stage.

Visibility: Mainly good outside of low cloud and rain

Temperature: **Glens:** Plus 2 rising to 8 Celsius
At 800m: Plus 4 Celsius
Freezing level: Above summits
